6. Mold Prevention/Removal Addendum

6.1 PURPOSE OF THIS ADDENDUM

The purpose of this Addendum for Chateau Knoll is to provide information and guidelines regarding the prevention and, if necessary, removal of mold spores from your home. It is our objective to work with residents to maintain a pollutant-free environment.

THIS FORM IS TO BE ATTACHED TO AND MADE PART OF A LEASE DATED for
3524 Chateau Knoll
Bettendorf, IA 52722
.

Moisture can encourage biological pollutants to grow. Moisture in your home can come from many sources. Water can enter by leaking or seeping through the roof or windows. Showers and cooking also add moisture to the air in your home. The amount of moisture that the air can hold depends on the temperature of the air. As the temperature goes down, the air is able to hold less moisture. This is why, in cold weather, moisture condenses on cold surfaces (for example, drops of water form on the inside of a window). Lessee shall notify Lessor in writing, upon observing any condition that may require inspection by Lessor.

6.2 PREVENTATIVE ACTION:

In order to minimize the potential for mold growth in your home, you must do the following:

- Reduce moisture. Mold cannot grow if humidity is lower than 50%.
- Always turn on exhaust fans in the kitchen when cooking and in the bathroom while showering or bathing.
- Limit use of humidifiers.
- Notify management in writing of any water leaks from plumbing, A/C or refrigerator drip pans, etc.
- Wipe off excessive moisture accumulation from surfaces such as shower stalls, mirrors, and windows.
- Always keep shower curtain inside the tub or make sure shower stall doors are closed tight.
- Ensure proper airflow throughout the unit.
- Do not block heating registers with furniture, boxes, laundry, etc.
- Open bathroom door immediately after showering or bathing.
- Open windows (weather permitting) to increase air flow and decrease humidity.
- Have proper ventilation in the apartment if there is an aquarium.
- Maintain Proper Housekeeping
 - Wet clothes, towels, bath mats and any other fibrous material items should be hung up to dry immediately after saturation.
 - Wet cellulose materials including paper products, cardboard, ceiling tiles, and wood are particularly conducive for mold growth. If mold is found on any of these materials, remove them immediately if possible. Otherwise dry the item(s) completely and contact management for further instructions for the clean-up process.
 - Clean bathrooms with mold killing products.

X VA
KFI Staffing

6.3 REMOVAL OF MOLD:

- For porous surfaces – remove and throw away the moldy material.
- For non-porous surfaces – clean mold and surrounding 1-foot area around infestation with soap and water. A dilution of 1:10 bleach to water may also be used, however, there may be a risk of discoloration depending on the surface on which it is applied.
- Dry the cleaned area completely.
- Locate and remedy the source of excessive moisture, and/or use a dehumidifier to lower humidity in the unit.

X VA
KFI Staffing

6.4 IMPORTANT -

- Lessee must notify the Chateau Knoll management in writing of any excess water infiltration (leaks) or reoccurring mold.
- If lessee finds reoccurring mold in your unit, lessee must notify the Chateau Knoll management in writing immediately!
